Summary

React Native developer with 2 years of hands-on experience building and shipping cross-platform mobile apps to Play Store and App Store using React Native CLI, with additional experience in Expo and EAS. Proficient in TypeScript and the React Native New Architecture (Hermes, Fabric, TurboModules). Delivered production features including real-time chat, deep linking, geolocation, Branch.io sharing, CRM autodialer workflows, and OAuth authentication. Comfortable owning features end-to-end — from native build configuration and architecture decisions to CI/CD and store deployment.

Skills

Languages:	TypeScript, JavaScript (ES6+), Node.js
React Native & Toolchain:	React Native CLI, React Native (New Architecture, Fabric, TurboModules), Hermes, Metro, Expo, EAS Build & Submit
Navigation & State:	React Navigation, Expo Router, Zustand, React Context, Axios, REST APIs
Storage & Data:	MMKV, AsyncStorage, JWT, OAuth 2.0 (Google Sign-In)
Testing & Quality:	Jest, React Native Testing Library
UI & Animation:	Reanimated, Gesture Handler, NativeWind, FlashList
Mobile Features:	FCM Push Notifications, Deep Linking, Branch.io, Geolocation, Socket.IO, WebSockets, Sentry
Device & Native:	Native Modules, Expo Notifications, Google Maps SDK
Release & Deployment:	Manual Native Builds (Gradle, Xcode signing), App Store Connect, Google Play Console, EAS Build & Submit
Tools & DevOps:	Git, GitHub, Azure DevOps, Jira, Postman, Docker, Flipper

Work Experience

React Native Developer | Yuvasoft Solutions Pvt Ltd

Dec 2025 –present

MagicalSwap- Rental Solution App | React Native CLI, TypeScript, Branch.io, App Store & Play Store Deployment | [Live Project](#)

- Magicalswap Rental Solutions is a rental platform for Indore that connects tenants and property owners with **verified rental listings** and **local area-manager support** to help the rental process
- Upgraded React Native version and all major dependencies to support the New Architecture (Fabric, TurboModules) — including native config changes in build.gradle and Podfile — resolving build/compatibility issues and maintaining production stability for an active Play Store user base of 5,000+.
- Implemented **deep linking** using Branch.io to enable property-sharing flows, increasing shareability of listings across platforms.
- Integrated a **geolocation** library to add location-based property discovery, allowing users to find nearby rental listings on a map.
- Integrated Sentry for crash monitoring and error tracking across Android and iOS.

React Native Developer | Ultraxpert Technologies Pvt Ltd

Jan 2025 – Dec 2025

Drinking Buddy – Social Networking App | React Native, TypeScript, Expo, React Navigation, Socket.IO, Google Maps SDK, Payment Gateway, EAS Build

- Developed core app features including **real-time chat**, club discovery using **Google Maps**, and in-app payments for Android and iOS.
- Implemented secure **Google Sign-In (OAuth 2.0)** with token-based session handling and protected screens.
- Built smooth, native-driven animations and gesture interactions **using Reanimated and Gesture Handler**, and styled the app with **NativeWind for a consistent**, utility-first design system.
- Managed **EAS build and release** configuration for Drinking Buddy, handling app IDs, signing and publishing to Play Store / App Store.
- .

CRM Autodialer – Mobile Sales App | *React Native, TypeScript, Expo, Zustand, FCM, AsyncStorage, REST APIs*

- Built a CRM autodialer app that receives leads via **FCM push notifications** and triggers native auto-dial through the device dialer, reducing manual dialing effort.
- Implemented an end-to-end **lead-to-call workflow**: lead notification → auto-dial → call duration tracking via AppState → outcome capture → history sync with backend APIs.
- Used **Zustand** for managing lead and call state and **AsyncStorage** for JWT token persistence and seamless, secure logins.
- Added **Jest unit tests** for core business logic and state management, improving code reliability and reducing regressions during feature updates.

SDE Intern | Site Guru and Websotech

June'24 -Aug'24

- Built responsive web dashboards using **Vue.js & Vuetify**, cutting page load times by ~40% and improving usability on desktop.
- Owned authentication and API-driven flows for **100+ daily users**, integrating backend APIs and fixing production issues to improve reliability.

Education

B.Tech in Computer Science & Engineering | Acropolis Institute of Technology and Research, Indore | 2021 – 2025 | CGPA: 7.83

Class XII – MPBSE, Lakshmi Shri Academy H.S School, Indore | 2021 | 75%

Class X – CBSE, South Valley International School, Betma | 2019 | 80%

Certifications & Achievements

- **Smart India Hackathon 2024 Finalist** – Selected among the top 1% of 500 teams for an IoT-based smart agriculture solution.
- Published research paper: "AURA: AI/ML–IoT Based Smart Home Solution" in the International Journal of All Research Education and Scientific Methods (IJARESM), Vol. 12, Issue 12, Dec 2024
- Meta – Advanced React (Coursera)
- NPTEL – Computer Networks (Elite + Silver, 75%+)
