SHAILENDRA PARIHAR

REACT NATIVE DEVELOPER

PHONE: +919993732470 linkedin.com/in/shailendraparihar07 github.com/shelu18

Email: shailendraparihar3630@gmail.com Indore, M.P

Summary

React Native developer with ~ 2 years of experience shipping production cross-platform apps to the Play Store and App Store using React Native CLI, Expo, EAS and TypeScript. Migrated a legacy Qt/C++ desktop app to mobile, building a custom BLE communication stack and offline-capable inspection workflow for an IoT device app, and upgraded a live rental app (5,000+ Android users) to the React Native New Architecture. Owns features end-to-end, from native build configuration and architecture decisions to store release.

Skills

Languages: TypeScript, JavaScript (ES6+)

React Native: React Native (CLI, Expo), React (Hooks), New Architecture (Fabric, TurboModules), Hermes, Native Modules

Navigation & State: React Navigation, Expo Router, Redux Toolkit, Zustand, TanStack Query, React Context

APIs, Auth & Storage: REST APIs, Axios, Socket.IO, WebSockets, JWT, OAuth 2.0 (Google Sign-In), MMKV, AsyncStorage

Device & Connectivity: BLE, Geolocation, Google Maps SDK, FCM Push Notifications, Expo Notifications, Deep Linking (Branch.io)

Testing & Monitoring: Jest, React Native Testing Library, Sentry, Firebase Crashlytics

UI & Animation: Reanimated, Gesture Handler, NativeWind, FlashList

Build & Release: Gradle and Xcode builds with signing, EAS Build & Submit, App Store Connect, Google Play Console

Tools: Git, GitHub, Azure DevOps, Jira, Postman, Android Studio, Xcode

Work Experience

React Native Developer | Yuvasoft Solutions Pvt Ltd — *Dec 2025 –present*

OneRADON – IoT Radon Monitoring & Inspection App | *React Native, TypeScript, Redux Toolkit, BLE, MMKV, REST APIs*

- **Migrated** a legacy Qt/C++ desktop application to React Native (0.84, New Architecture), porting its device communication, business logic, data parsing and AES-128 encryption into a cross-platform Android/iOS app.
- **Engineered** a custom BLE communication stack supporting **4 hardware models** and **~100 device commands**, with binary packet building and parsing, command queuing, retry handling, notification stream reassembly and connection keep-alive.
- **Built** an offline-capable test-data workflow that downloads up to **999 records per test** over BLE, parses multi-sensor readings (temperature, humidity, pressure, VOC, CO2), computes test averages, and stores raw and processed data with Redux Toolkit and MMKV.
- **Developed** an inspection reporting module with photo management, checklists, reusable templates and regulatory compliance data, plus ZIP export, backend PDF

MagicalSwap Rental Solution App | *React Native CLI, TypeScript, Branch.io, App Store & Play Store Deployment | Live Project*

- Upgraded React Native from 0.73 to 0.83 to support the New Architecture (Fabric, TurboModules), fixing build and compatibility issues in build.gradle and Podfile, and kept the app stable for 5,000+ Play Store users, with Sentry crash monitoring on Android and iOS.
- Implemented Branch.io deep linking so users can share a property and the link opens that exact listing inside the app
- Integrated a **geolocation** library to add location-based property discovery, allowing users to find nearby rental listings on a map.

React Native Developer | Ultraxpert Technologies Pvt Ltd — *Jan 2025 – Nov 2025*

Drinking Buddy – Social Networking App | *React Native, TypeScript, Expo, React Navigation, Socket.IO, Google Maps SDK, Payment Gateway, EAS Build*

- Developed core app features including **real-time chat**, club discovery using **Google Maps**, and in-app payments for Android and iOS.
- Implemented secure **Google Sign-In (OAuth 2.0)** with token-based session handling and protected screens.
- Built smooth, native-driven animations and gesture interactions **using Reanimated and Gesture Handler**, and styled the app with **NativeWind for a consistent**, utility-first design system.
- Managed **EAS build and release** configuration for Drinking Buddy, handling app IDs, signing and publishing to Play Store / App Store

CRM Autodialer – Mobile Sales App | *React Native, TypeScript, Expo, Zustand, FCM, AsyncStorage, REST APIs*

- Built a CRM autodialer app with **file-based navigation using Expo Router** that receives leads via FCM push notifications and triggers native auto-dial through the device dialer, reducing manual dialing effort.
- Implemented an end-to-end **lead-to-call workflow**: lead notification → auto-dial → call duration tracking via AppState → outcomecapture → history sync with backend APIs.
- Used **Zustand** for managing lead and call state and **AsyncStorage** for JWT token persistence and seamless, secure logins.
- Added **Jest unit tests** for core business logic and state management, improving code reliability and reducing regressions during feature updates.

Education

B.Tech in Computer Science & Engineering | Acropolis Institute of Technology and Research, Indore | 2021 – 2025 | CGPA: 7.83

Certifications & Achievements

- **Smart India Hackathon 2024 Finalist** – Selected among the top 1% of 500 teams for an IoT-based smart agriculture solution.
- Meta – Advanced React (Coursera)
- NPTEL – Computer Networks (Elite + Silver, 75%+)
